1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington,* 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-6, 10-13, 16-20, and 24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5, 15, 16, 19, 20, 22, and 23 of U.S. Patent No. 6,297,329. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a coating composition comprising a bicyclo-orthoester having an additional hydroxyl reactive group, such as an ester or epoxy group.

3. Claims 1-6, 10-13, 16-20, and 24 are directed to an invention not patentably distinct from claims 1-5, 15, 16, 19, 20, 22, and 23 of commonly assigned U.S. 6,297,329. Specifically, each

set of claims is drawn to a coating composition comprising a bicyclo-orthoester having an additional hydroxyl reactive group, such as an ester or epoxy group.

4. The U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP § 2302). Commonly assigned U.S. 6,297,329, discussed above, would form the basis for a rejection of the noted claims under 35 U.S.C. 103(a) if the commonly assigned case qualifies as prior art under 35 U.S.C. 102(f) or (g) and the conflicting inventions were not commonly owned at the time the invention in this application was made. In order for the examiner to resolve this issue, the assignee is required under 35 U.S.C. 103(c) and 37 CFR 1.78(c) to either show that the conflicting inventions were commonly owned at the time the invention in this application was made or to name the prior inventor of the conflicting subject matter. Failure to comply with this requirement will result in a holding of abandonment of the application.

A showing that the inventions were commonly owned at the time the invention in this application was made will preclude a rejection under 35 U.S.C. 103(a) based upon the commonly assigned case as a reference under 35 U.S.C. 102(f) or (g), or 35 U.S.C. 102(e) for applications filed on or after November 29, 1999.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
>
> (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 10, 11, 16-19, and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Hall et al. ('798).

Patentees disclose coating compositions comprising polyisocyanates and bicyclo-orthoester compounds containing acrylate or methacrylate groups. See abstract; column 2; and column 3, lines 1-27 within the references. The disclosed bicyclo-orthoester meets applicants' bicyclo-orthoester when C is a functional group corresponding to structure (IX) or (X).

7. Claims 1-6, 10-13, 16-20, and 24 are rejected under 35 U.S.C. 102(a) as being anticipated by WO 97/31073 and 35 U.S.C. 102(e) as being anticipated by van den Berg et al. ('329 or '479).

WO 97/31073 and van den Berg et al. disclose coating compositions comprising a hydroxyl-reactive group containing compound and a bicyclo-orthoester compound that contains alk(en)yl groups containing hydroxyl-reactive groups, such as ester or epoxy groups. See abstracts and definitions of R_1 and R_2. The references further disclose the use of catalysts to free the latent hydroxyl groups and to promote the reaction of the hydroxyl groups with the hydroxyl-reactive groups. Applicants' claimed definitions of B and C encompass the compounds of the references.

8. Claims 7-9 and 21-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
